Course	COMP-8567	June 01, 2020
Instructor	Dr. B. Boufama	
Assignment	01	
Due date	Monday 8, 11.59pm	

Modify the solution of your lab 01 **findFile** <**file-name**> so that it can find a file or a directory in the current directory hierarchy (i.e., searches recursively in subdirectories).

Call example:
findFile letter.txt : searches for **letter.txt** in current directory and all its subdirectories

Hint: use a seperate recursive function to search for file-name.
